Technology Educator Concentration

MSEd Curriculum and Instruction – General Education

Education today involves complex learning environments that involve digital tools and materials. It is critical that teachers have the skills and access to resources needed to provide an effective 21st Century education for their students. The courses in this focus area provide a foundation from which teachers can build and facilitate high quality learning environments for their students.

The courses in this program include*:

IT 614 Technology in Education
IT 566 Teaching and Learning with Simulations and Games
IT 544 Desktop Publishing
IT 545 Preparing and Delivering Professional Presentations

*Other courses, with approval of advisor, are also accepted.
