## EXPLORING THE NONPROFIT LANDSCAPE

**Abstract:** This presentation will explore the current nonprofit landscape as it relates to the knowledge, skills, and abilities of its existing workforce and the gaps that it needs help filling. Data was gathered from a variety of nonprofit organizations in St. Lawrence, Jefferson, and Franklin counties to help identify which knowledge, skill, and ability gaps could best be addressed at the college level. By understanding and addressing these gaps, we can help empower the future workforce of our local nonprofits, who deliver essential services to vulnerable populations in our communities.
